CROP BULLETIN FOR THE WEEK

Dry, Cold Weather and High Winds Prevailed

ALL GROWTH WAS CHECKED

Wheat Was Damaged Some During the Week.

Okiahoma City, O. T., April 26.-C. M. Strong, section director of the weather bureau, has issued a bulletin on climate and crop conditions for the week ending Monday, April 25. It follows:

Dry, cold weather, high winds and frosts checked the growth of all crops and vegetation until the 21st, when warmer weather and rains caused a general improvement in the conditions over nearly all portions of the section. The heavy rains over the southern portion of the Indian Territory delayed the progress of farm work.

The continued cold and drouth caused general decline in the condition of the wheat and out crops until the rains and warmer weather set in; since then these crops have Improved over portions of the the remainder of the section were in too poor a condition to receive much benefit. fields are being plowed up and placed to other crops.

Corn planting is nearing completion, the early planted is coming up generally to a fair stand, and is being cultivated the has germinated poorly, and much has failed to sprout on account of the drouth and cold ground.

Cotton ground is still being prepared and planting is progressing. The work has been delayed over the Choctaw nation by rains; early planted cotton is up to a fair to good stand, but growth was de layed by the cold weather.

are doing well; some early vegetables are being marketed.

Alfalfa and range grass have made a

To Prove what Swamp-Root, the Great Kidney Remedy, will Do for YOU, every Reader of The Eagle May Have a Sample Bottle Sent Free by Mail.

Weak and unhealthy kidneys are responsible for more first time, but is making a slow growth sickness and suffering than any other disease, therefore, when on account of the cold; the late plant through neglect or other causes, kidney trouble is permitted to continue, fatal results are sure to follow.

> Your other organs may need attention-but your kidneys most, because they do most and need attention first.

If you are sick or "feel badly," begin taking Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder remedy, because as soon as your kidneys begin to get better they will help all the Early potatoes and garden vegetables other organs to health. A trial will convince anyone.

mild and immediate effect of poor digestion, being obliged to pass your fair growth, and stock is generally doing Swamp-Root, the great kidney and water frequently night and day, smartbladder remedy, is soon realized. It ing or irritation in passing, brick-dust stands the highest for its wonderful cures or sediment in the urine, headache, backplanted and ground is being prepared for of the most distressing cases. Swamp-Frosts caused some slight damage to Root will set your whole system right, and kidney trouble, skin eruptions from ache, lame back, dizziness, sleeplessness, bad kidney trouble, skin eruptions from bad blood, neuralgia, rheumatism, dia-

and the best proof of this is a trial.

13 Cottage St., Melrose, Mass.

Dear Sir. Jan 11th, 124.

"Ever since I was in the Army, I had more or less kidney trouble, and within the past year it became so severe and complicated that I suffered everything and was much alarmed—my strength and power was fast leaving me. I saw an advertisement of Swamp-Root and wrote asking for advice. I began the use of the mesicine and noted a decided improvement after taking Swamp-Root only a short time.

I continued its use and am thankful to say that I am entirely cared and strong in order to be very sure about this, I had a doctor examine some of my water to-day and he pronounced it all right and in sphendid condition.

I know that your Swamp-Root is purely vegetable and does not contain any harmful drugs. Thanking yow for my complete recovery and recommending Swamp-Root to all sufferers, I am."

Very truly yours.

I. C. RIUCHARDSON.

Very truly yours, I. C. RICHARDSON.

Swamp-Root is pleasant to take and You may have a sample bottle of this in bottles of two sizes and two pricesground and growing slowly; corn that famous kidney remedy. PROF. DE BARR MADE ASSAYS

If Specimens Come from the Hills Gold Is There.

WILL MAKE OTHER TESTS

Next June He Will Work in the Field.

Norman, O. T., April 26.-There were Barr of the University of Oklahoma on last Saturday, which if the sepcimens found, certainly demonstrate that there s gold in certain locations in the Wichita mountains, in paying quantities.

During the lase week Professor DeBarr, who holds the chair in the university as instructor in chemistry and pharmacy, ac cepted an invitation from the citizens of Roosevelt to lecture at that place. While there a few of the miners in that locality secured teams and persuaded Mr. Delsarr to accompany them on an inspection of their mines. On this trip Professor De Barr personally visited a number of their nines about Roosevelt and secured for himself several samples or specimens. He made several assays of ore which had been sent to him from this same region but found only a slight trace of gold and silver. In fact, none of the samples that have been examined at the university by the professor up to this time had shown either gold or silver in paying quantities: Upon his return here the professor made a very careful assay of some six or eight of these ores but only in instance did he find any gold to speak of. This exception showed gold \$1.75 per ton with a slight trace of silver. However, the miners at Roosevelt, undaunted by these results, sent over two of their number with a number of other specimens to be assayed. These men, Mr, R. W. Rayle of Roose-

velt and Mr. J. B. Lenertz of Granite, arrived here Friday and spent that after noon and all of the following day in the laboratory with Dr. DeBarr watching him make the assays. Mr. DeBarr was very careful in his work and saw to it that very specimen was given a fair test. The cres were brought over in rock form, not crushed, and in the doctor's opinion were genuine samples and not "doctored." In fact Professor DeBarr was as much surprised as any one about the institution when the actual results were learned.

There were in all some twenty samples ested and gold was found in every one of them ranging from 50 cents to \$26. The undisturbed in a glass or bottle for twenty-four hours, forms a sediment or brest assays running from \$3.75, \$4.80, settling or has a cloudy appearance. It \$6.40, \$9.60, \$45 and \$96 per ton.

The best ore was claimed to have been taken from the Hester mine which is lo-Swamp-Root is the great discovery of cated on a school section half way be-Dr. Klimer, the eminent kidney and blad- tween Wildman and Roosevelt. Is Not Surprised at the Appearance of the Scale.

Guthrie, O. T., April S .- The discovery turn, via Nickel Plate road, May 16th, of the San Jose scale on the fruit trees 13th and 18th. Tickets good going date of in Logan county was mentioned to Sec sale and returning to and including June retary Thobarn of the territorial board of agriculture today and he was asked if

While it is a matter of great impor-

out regulation or hindrance. A bill was prepared to provide for the inspection of nurseries within the limits of the territory and to regulate the importation of nursery stock from other states and territories at the last session of the territorial legislative assembly. The bill passed both houses, but was vetoed by the governor because of its mutilation by an in-competent engrossing clerk.

"This matter, as well as the importation of cotton seed, which is infested with the boll weevil, is made the subject of frequent letters to the governor, the attorney general, the experiment station and the office of this board. We have already prepared a legislative measure covering this whole question and it is probable that in another year there will e a law by which the agricultural and horticultural interests of Oklahoma may be protected against the practices of careless or dishonest nurserymen and

The bill which has been prepared has in which they are calimed to have been been submitted to the attorney general and the governor for examination. The leading fruit growers and nurserymen of the territory will also be asked to examine it, to the end that no feature may

It is to be hoped that the area affected by the San Jose scale in this county is limited and that efforts may be made to stamp it out at once without waiting for legislative sanction."

ERA OF BUILDING.

There Will Be Some Rails Laid in the Territory This Year.

Guthrie, O. T., April 26.-It is some times claimed that no big enterprises are mmenced during the year of presidential elections, but there are indications that an era of railroad building is about to be inaugurated in the Indian territory and Oklahoma.

Work is now being pushed on the Mid- Rank, and land Valley road, in the Indian territory. and present indications are that work on the Kansas City, Oklahoma and Houston road will be commenced shortly. All over Oklahoma the people are looking for the building of new roads, and the following, from the Custer County Republican, will pretty well illustrate conditions

some other sections: "A report from Dewey county says that surveying crews are all over the county, and prospective roads seem to be outlined in every direction. The farmers are getting alarmed, fearing that there will be no farms left after the roads have their right of ways all secured. Three railroads are being projected through the county at the present time. The surveying corps of the Arapaho, Taloga and Northern has been organized and is ready to proceed with the survey. The Colorado, Oklahoma and Southeastern has routes from Weatherford to Woodward, each passing through Dewey county. Anver, Woodward and Southwestern, is also the free in the field. This survey passes four miles from Taloga and five miles from
